HISTORY

Indigenous Panasia Lifescience (OPC) Pvt. Ltd. is the culmination of a lifelong passion for Ayurvedic herbs and their healing properties. Our founder, Mr. Chandeeep Singh, has been fascinated by herbs and natural remedies since childhood. He grew up in a family that valued traditional healing practices, and he spent many hours learning about the medicinal properties of plants and herbs from his parents and grandparents.

As he grew older, his interest in Ayurveda continued to deepen. He spent countless hours studying ancient texts and learning from Ayurvedic practitioners. He began experimenting with different herbal remedies and formulations, and he quickly discovered that he had a talent for creating compelling and natural products.

Over the years, his passion for Ayurvedic herbs and entrepreneurial spirit led him to start his own company. He began by selling his products to friends and family, and word quickly spread about the quality and effectiveness of his products. As demand grew, he decided to turn his passion into a full-time business, and Biotanies was born in 2018.

ABOUT US

Indigenous Panasia Lifescience (OPC) Pvt. Ltd. is a leading Ayurvedic product manufacturing company that specializes in using herbal extracts to create natural health and beauty products. Our mission is to provide safe, effective, and eco-friendly products that promote health and wellness.

WHY US?

Because accessibility and technology in healthcare are necessary now more than ever.

Major Goals

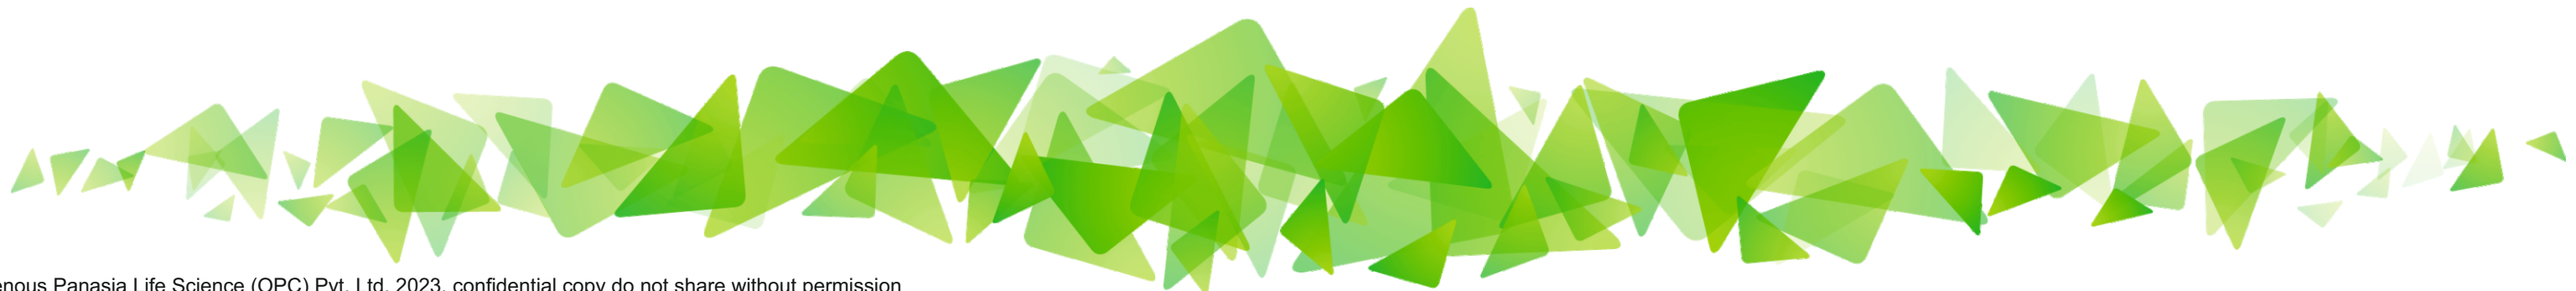

We provide safe, effective, and eco-friendly products that promote health and wellness.

Your one-stop destination for natural, Ayurvedic-inspired skincare and healthcare products. We believe that true beauty and wellness come from within, and we're dedicated to helping you achieve your health and beauty goals through the power of natural, plant-based ingredients.

Manufacturing Process

We take great pride in our manufacturing process, which combines traditional Ayurvedic techniques with modern technology. We grow our own herbs instead of buying from vendors because we know that there are concerns about adulteration in the market. This focus on purity sets us apart from generic Ayurvedic products that may not be as effective due to impurities.

Key Company Strategies

Leading third-party manufacturer of Ayurvedic Healthcare, Skincare, and Nutraceutical Products

IP Lifescience is your one-stop destination for natural, Ayurvedic-inspired skincare and healthcare products. We believe that true beauty and wellness come from within, and we're dedicated to helping you achieve your health and beauty goals through the power of natural, plant-based ingredients.

YOUR IDEA + OUR EXPERTISE = PROFITABLE PRODUCT

If your company is considering selling products under its name or adding new products to its current lineup, private labeling may be a good option for you. Private labeling allows you to outsource the manufacturing, sourcing, importing, shipping, and other aspects of the supply chain to another company.

BENEFITS OF PRIVATE LABELLING

Why should you choose Third Party Manufacturing?

- Ideal for businesses looking to sell products under their brand name or expand their existing product line.
- Leverage the expertise of another company to handle critical aspects of the supply chain.
- Streamline operations and free up resources to focus on marketing, sales, and customer service.
- Access a wider range of products and create high-quality products that meet customers' needs.
- Increase market share and improve profitability.
- Build brand recognition and loyalty.
- Offer unique, high-quality products under your brand name.
- Differentiate yourself from the competition and build a loyal customer base that trusts your products.
- Increase customer retention, positive word-of-mouth, and ultimately, higher revenues.
- A cost-effective and efficient way for businesses to expand their product offerings and gain access to the entire supply chain.
- Private labeling can help businesses reduce the time and costs associated with product development, as they can rely on the manufacturer's existing product formulations and expertise.

STEP-BY-STEP GUIDE

Get started for your Third party manufacturing needs, with IP Lifescience.

If you're looking for a private labeling manufacturer for healthcare, skincare, or nutraceutical products, IP Lifescience is the perfect partner for your business. Our team offers a variety of format and composition options to meet your unique requirements.

We also provide free consultancy and support to help you select the right products to maximize your business potential. Our experienced team is dedicated to developing the best products based on market requirements, and we offer pre- and post-sale services to boost your business.

1. Variety of formats and compositions

We offer a wide range of options for healthcare, skincare, and nutraceutical products to meet the specific requirements of our clients. This includes different formats such as capsules, tablets, liquids, creams, gels, and more, as well as different compositions based on client preferences and market demand.

2. Free product selection consultancy

We provide free consultancy and support to our clients in selecting the best products for their business based on market trends and demand. This helps our clients maximize their business potential and choose the most profitable products to sell under their private label.

STEP-BY-STEP GUIDE

3. Experienced product development team

Our team of experts has years of experience in developing high-quality products that meet market demand. We work closely with our clients to understand their requirements and create products that meet their specific needs, ensuring their private-label products stand out in the market.

4. Pre-and post-sale services

We offer a range of pre-and post-sale services to support our clients' business growth, including marketing and branding support, packaging design, label printing, and more. We aim to help our clients succeed by providing comprehensive support throughout the product development and sales process.

5. Complete process management

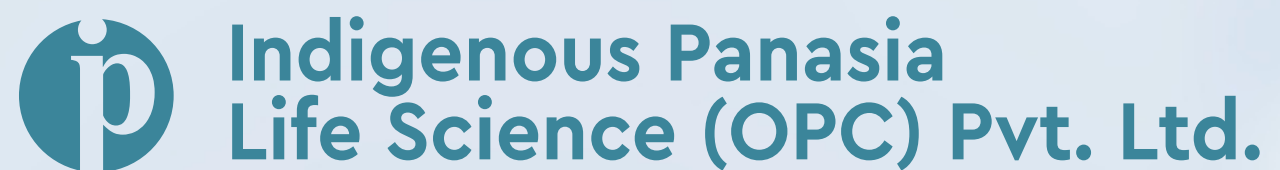

We take care of the complete process from design to dispatch after order confirmation to save our clients' energy and time. This includes product formulation, manufacturing, packaging, labeling, and shipping, ensuring that our clients can focus on other aspects of their business while we handle the production process.

6. Natural and high-quality products

All of our products are manufactured using natural ingredients and are designed to meet high-quality standards. We use only the best ingredients and production processes to ensure that our clients receive products that are safe, effective, and in high demand.
